

SOUTHERN CALIFORNIA MONITORING ASSOCIATION

BRUSH FIRE FREQUENCIES!

SOUTHERN CALIFORNIA FIRE AGENCIES

As most of you know our fire season is now all year around. This makes it very hard on our men and women of are various fire agencies through out California who come to Southern California area to fight brush fires! Here is a list of frequencies that are used in fighting brush fires in our area. Make sure that you have at least some of these frequencies programmed in your scanner so you can catch all the action that takes place. If any of you find that we have left out a frequency, please email it to the Southern California Monitoring Association so that we may update this list. **This list is free to anyone who asks for it at no cost** as long as it is emailed to you. If it has to be mailed to you, please send a S.A.S.E. to use with postage for 3 to 4 pages of information and allow at least one-week turn around.

Special thanks to [Rick, WA6KFI at Metropolitan Radio Data Service](#) and to the members at the [Southern California Monitoring Association in Los Angeles](#) for providing this detailed list of fire agencies frequencies to make all are monitoring a lot easier for all of us.
